

Defending Health Care in 2017: What's at Stake for Louisiana

With a new president and Congress, the health care gains made throughout the last six years face their greatest threat yet. Congress has voted more than 60 times to roll back the historic progress that has been made to expand health coverage to millions of people in this country and to improve coverage for those who already had it. These proposed changes will put the health—and lives—of countless Louisianans at risk. Here's what Louisiana stands to lose if the new president and Congress move forward to upend our health care system:

Hundreds of thousands of Louisianans stand to lose health coverage

558,000 Louisianans stand to lose their health coverage.¹

Louisiana stands to lose **\$27 billion** in federal funding for Medicaid, CHIP, and financial assistance for marketplace coverage.²

Approximately **171,000** Louisianans who currently get financial assistance to help pay for their health coverage will lose this help and will no longer have affordable coverage options. In 2016, Louisianans receiving financial assistance saw their monthly premiums reduced on average **\$362** thanks to this help.³

The now-historically low rate of uninsured people will spike, with the number of uninsured in Louisiana increasing **154 percent** by 2019.⁴ This will reverse the immense progress that has been made to expand coverage. Between 2013 and 2015:

- » The number of uninsured in Louisiana declined **28 percent.**⁵

- » Working Louisianans: The uninsured rate among working Louisianans saw a **30 percent** decline.⁶

Repeal will end Louisiana's Medicaid expansion and cause ripple effects across the state economy

354,000 people stand to lose health coverage, most of whom are working.⁷ The Medicaid expansion has extended health coverage to lower-income Louisianans who hold down jobs that are the backbone of the state's economy—from fast food workers to home care attendants to construction workers to cashiers. Repeal will leave these hard working Louisianans out in the cold.

Louisianans with private health insurance will be stripped of vital protections against discrimination

Approximately **2 million** Louisianans with pre-existing conditions like asthma, diabetes, and cancer could once again be denied affordable, comprehensive coverage that actually covers their health care needs.⁸

Women in Louisiana will once again be charged more for health coverage just for being a woman.

- » Prior to the Affordable Care Act (ACA), women in Louisiana were charged as much as **37 percent** more than men for the same coverage.⁹

Louisianans will once again face a world where insurance plans routinely cap the most they will pay for someone's health care in a year and in their lifetime, effectively cutting off coverage for the sickest individuals when they most need it.

- » Roughly **1.4 million** Louisianans (including **385,000** children) saw lifetime limits on coverage disappear thanks to the ACA's ban on these practices.¹⁰

Millions of Louisianans will lose guaranteed coverage of free preventive services, like recommended cancer screenings and vaccines

Approximately **1.7 million** Louisianans with private health coverage (including **359,000** children) and **793,000** Louisiana seniors on Medicare will lose guaranteed access to free preventive care, like blood pressure screenings, immunizations, and cancer screenings.^{11,12}

Insurance companies will no longer be required to put Louisianans' premiums toward care, not profits

Insurers will no longer be held accountable for using people's premium dollars on care and quality improvement or paying back the difference.

- » Louisianans have received around **\$9.7 million** in refunds from plans that overcharged for premiums since the ACA took effect.¹³

Thousands of seniors and people with disabilities will lose comprehensive drug coverage

The Medicare donut hole will re-open. This will leave Louisiana seniors and people with disabilities with a gap in prescription drug coverage and forced to pay thousands of dollars more in drug costs.

- » Seniors and people with disabilities in Louisiana have saved **approximately \$292 million** on drug costs thanks to the ACA's closing the Medicare donut hole.¹⁴
- » In 2015 alone, approximately **74,000** seniors and people with disabilities in Louisiana saved on average **\$989** on drug costs.¹⁵
