MEDICAID IN WYOMING

Medicaid and the Children's Health Insurance Program (CHIP) provide health and long-term care coverage to more than 60,000 low-income children, pregnant women, adults, seniors, and people with disabilities in Wyoming. Medicaid is a major source of funding for safety-net hospitals and nursing homes. Federal policy proposals could fundamentally change the scope and financing of the program.

Snapshot of Wyoming's population

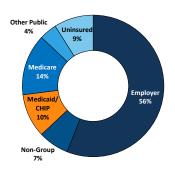

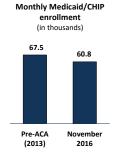

Per 100,000 population in 2014

How has Medicaid affected coverage and access?

In 2015, 10% of people in WY were covered by Medicaid/CHIP.

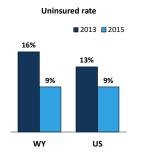

Since implementation of the Affordable Care Act (ACA), Medicaid/ CHIP enrollment has decreased in WY.

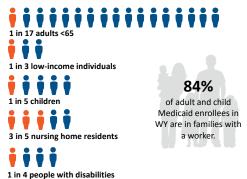

Did WY expand Medicaid through the ACA?

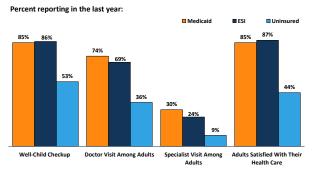

The uninsured rate in WY has decreased.

In WY, Medicaid/CHIP covers:

Nationally, Medicaid is comparable to private insurance for access and satisfaction - the uninsured fare far less well.

Medicaid coverage contributes to positive outcomes:

- · Declines in infant and child mortality rates
- · Long-term health and educational gains for children
- · Improvements in health and financial security

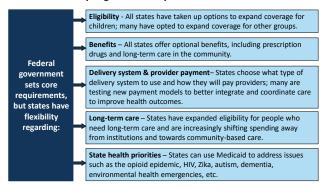

And...

>85%

of the public would enroll themselves or a child in Medicaid if uninsured.

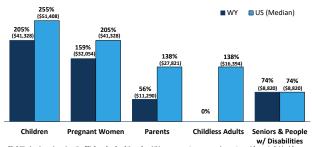

How does Medicaid work and who is eligible?

Each Medicaid program is unique:

Medicaid/CHIP eligibility levels are highest for children and pregnant women.

Eligibility Level as a Percent of FPL, as of January 1, 2017

Eligibility levels are based on the FPL for a family of three for children, pregnant women, and parents, and for an individua childless adults and seniors & people w/ disabilities. Seniors & people w/ disabilities eligibility may include an asset limit.

How are Medicaid funds spent and how is the program financed?

Medicaid plays a key role in the U.S. health care system, accounting for:

* 0 0 | * 0 0 | * 0 0 | * 0 0 | * 0 0 | \$1 in \$6 dollars spent overall in the health care system

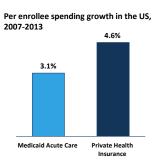

*00 *00 *00

More than \$1 in \$3 dollars provided to safety-net hospitals and health centers

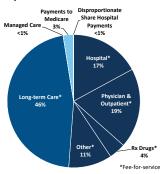

\$1 in \$2 dollars spent on long-term care

On a per enrollee basis, Medicaid spending growth is slower than private health care spending, in part due to lower provider payments.

In FY 2015, Medicaid spending in WY was \$566.4 million.

0.96

is the Medicaid-to-Medicare physician fee ratio in WY.

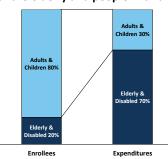

50%

of long-term care spending in WY is for home and community-based care.

100%

of beneficiaries in WY are in fee-for-service.

In 2011, most Medicaid beneficiaries in WY were children and adults, but most spending was for the elderly and people with disabilities.

11,600

Medicare beneficiaries (14%) in WY rely on Medicaid for assistance with Medicare premiums and cost-sharing and services not covered by Medicare, particularly longterm care.

47%

of Medicaid spending in WY is for Medicare beneficiaries.

Federal funding to states is guaranteed with no cap and fluctuates depending on program needs.

In WY the federal share (FMAP) is 50%. For every \$1 spent by the state, the Federal government matches \$1.

Expansion states receive an increased FMAP for the expansion population. WY did not expand Medicaid and did not receive additional federal funds.

12%

of state general fund spending in WY is for Medicaid.

23%

of all federal funds received by WY is for Medicaid.

What are the implications of reduced federal financing in a Medicaid block grant or a per capita cap?

Congress may soon debate proposals to reduce federal Medicaid funding through ACA repeal and federal caps.

The March 2016 Budget Resolution would reduce federal Medicaid spending by 41% nationally over the 2017-2026 period.

> Total reduction in federal funds: \$2.1 trillion

The impact of a block grant or per capita cap will depend on funding levels, but could include:

Increases in the number of uninsured

Reduced access and service utilization, decreased provider revenues (to hospitals, nursing homes, etc.), and increased uncompensated care costs

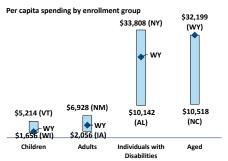

Increased pressure on state budgets

Decreased economic activity

A per capita cap could lock in historical state differences or redistribute federal funds across states.
